Function

function.sh

```bash
#!/bin/bash

add1 ()
{
  echo $[$1 + $2]
}

function add2
{
  return $[$1 + $2]
}

echo "Enter two numbers: "
read a b
echo ""
echo "Add1"
add1 $a $b

read

echo "Enter two numbers: "
read a b
echo ""
echo "Add2"
add2 $a $b
echo $?
```

Passing Arguments

parameter.sh

```
#!/bin/bash

echo "Print the second argument:"
echo $2

echo "Print the nuumber of arguments"
echo $#

echo "Print all the arguments"
echo $*
```

parameter.sh

```
./parameter.sh 10 20 30
```
